How to make a jelly

**Ingredients:** jelly packets  
cold water, hot water.

**Equipment:**  
• bowl  
• spoon  
• fridge

## Method

First break the jelly into cubes. Next add hot water and stir. Then add cold water and stir again carefully. Don't forget to wash your hands at the start. After that put it in the fridge for at least a whole night or 24 hours. The jelly is ready to eat when it is set in the fridge. Excellent instructions
